

8031 and 5248 save
the day

8031 and 5248 were enjoying a day in the garden when all the sudden they heard a loud BOOM in the distance.

Then the trains went towards the loud BOOM to figure out what was happening. The trains found that there was a **HUGE** crash.

The trains tried to make themselves free but they were stuck.

Then the bridge collapsed.

As the trains untangled themselves
they noticed that they were both
hurt.

The trains called for help

Then the trains went over the bridge together.

Then the trains headed towards the tunnel through the snowy landscape.

Then the trains entered the garden
and decided to go to house.

Then the trains went into the sheds.

As the trains headed off to sleep
they were thankful for eachother.
